PROFESSIONAL SUMMARY

Final year Computer Science Engineering (Cybersecurity) undergraduate with hands-on experience in penetration testing, OSINT reconnaissance, and web application security. Proficient in Java-based Data Structures and Algorithms with strong problem-solving skills. Passionate about building secure systems and solving complex technical challenges across security and software domains.

INTERNSHIP EXPERIENCE

Cybersecurity Intern, Hackup Technologies

June 2025 – July 2025

- Assessed 5+ web applications using OWASP Top 10, identifying 10+ critical misconfigurations across network services
- Simulated Evil Twin and XSS attacks on test environments to identify wireless and web application vulnerabilities
- Performed OSINT reconnaissance using Maltego and developed Python scripts to automate port enumeration and vulnerability detection
- Analyzed network protocols (HTTP, FTP, SMTP) using Wireshark to detect exploitable security weaknesses

PROJECTS

SecureSphere: AI-Based Secure Communication System

- Built an AI-based secure communication system with real-time threat detection across text, audio, and visual inputs with automated risk-scored alerts
- Implemented a cryptographic evidence vault using hash-based integrity verification for digital forensics and post-incident auditing
- GitHub: github.com/BALAJI-R02/secure-sphere

Anti Wildlife Tracking: AI Monitoring System

- Developed an NLP-powered system to detect illegal wildlife trade across websites, social media, and dark web platforms in real time
- Automated suspicious listing detection and hidden communication pattern recognition to enable faster response by protection agencies
- GitHub: github.com/BALAJI-R02/Anti-Wildlife-Tracking

TECHNICAL SKILLS

Programming: Java, Python

Web Development: HTML, CSS, JavaScript, React, MySQL

Data Structures and Algorithms: Arrays, Linked Lists, Stacks, Queues, Trees, Graphs (Java)

Security Tools: Nmap, Wireshark, Maltego, Burp Suite

Core Areas: Networking, Penetration Testing, OWASP Top 10, Web Application Security

Platforms and Utilities: Linux (Kali), Git, GitHub, Canva, VS Code, Windows

CERTIFICATIONS AND WORKSHOPS

- Practical Cyber Security for Cyber Security Practitioners, NPTEL (Score: 92%)
- Cybersecurity Analyst Job Simulation, Tata Forge
- Red Team Leaders, CCEP
- Introduction to Penetration Testing, Security Blue Team
- Microsoft Security Essentials Professional Certificate, Microsoft and LinkedIn Learning
- OWASP Coimbatore Chapter Meetup, Cybersecurity Awareness and Networking Event, Kumaraguru College of Technology

HACKATHONS AND COMPETITIONS

CCTV Surveillance Security and Forensics Hackathon 2.0

Presented an innovative security-focused solution addressing real-world surveillance and digital forensics challenges.

MSME Idea Hackathon 5.0

Developed and presented an idea proposal; selected and advanced to Round 2 out of competitive nationwide submissions.

24-Hour Hackathon, Coimbatore Institute of Technology

Collaborated in a team to design and prototype technology-driven solutions under real-world time constraints.

CodeZap Hackathon, Descience Open Source Club

Participated in an inter-college hackathon focusing on AI tools, agile methodologies, and real-world problem-solving.

Problem-Solving Contest, Bannari Amman Institute of Technology

Participated in a competitive problem-solving contest focusing on algorithmic and logical challenges.

Codeathon, Sri Ramakrishna Engineering College

Participated in a coding competition involving real-world problem scenarios.

EDUCATION

Dr. NGP Institute of Technology

B.E. Computer Science and Engineering (Cybersecurity)

2023 – 2027

CGPA: 8.2

Sri Sowdeswari Vidyalaya Matriculation Hr. Sec. School

HSC: 82%

LANGUAGES
